

A Holiday Your Dog Can Miss...

More dogs go missing on July 4th than any other day of the year.

Please keep your dogs inside.

It's more than just fireworks that can scare your dog, it can be firecrackers, bottle rockets, roman candles ...

Take an early walk. Getting your dog exercised way before the human fun starts is the best idea.

Please be sure your dog's tags are up-to-date and securely attached to their collar. Is your microchip registration current? Do you have an up-to-date picture, just in case?

It's a great day for your dog to stay inside and watch some Netflix, get a good belly scratch, and listen to mellow music.

Fireworks aren't always on the 4th. Also, be aware of raindates.

Heading out? Leave Fido in.

Dogs hear "louder" than we do ... Fireworks are scary.
